

## **Winawood™ Garden Benches FAQ's**

Here is a list of some of the common questions we receive about our range of Winawood™ garden benches, and some of the information you may require before you purchase a bench.

### **1. Do these benches come flat packed or fully assembled?**

These benches are delivered flat packed in a box, with plenty of padding to protect them on their journey. If they were to be delivered ready built using a courier, then they could get damaged en route. We can offer delivery of these benches fully built, but it is with our own garden centre delivery service, and this can only be done in an area around Leicestershire and the Midlands.

### **2. Is Winawood™ made from plastic?**

Not in the conventional sense. Winawood™ is a composite of a few materials that are created and compacted during the formation of polystyrene, creating a hard solid structure that is much heavier and durable than hardwood, and certainly contains none of the traits you would think of a plastic bench.

### **3. Can you create any other colours of bench?**

Unfortunately, we can only provide the range of colours that we purchase from Winawood™ themselves, and cannot make special colour requests to the manufacturer.

### **4. Are these benches going to rot or warp like normal wooden benches?**

No, these benches are completely weather proof, and will not warp or become damaged by the weather in anyway. They will look brand new for years to come, and that's why they come with a 3 year guarantee!
